DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 5 is considered indefinite because the claim recites "other light emitting material". It is unclear what "other" light emitting materials may be included in addition to fluorescent dyes and phosphorescent dopants.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Mori (US 5,281,489).

Mori discloses light emitting devices comprising a luminescent layer comprising luminescent material and a polymeric binder agent (see col. 27, lines 15-38). The luminescent material is disposed between a cathode and an anode (see abstract).

6. Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Kido et al. (JP 09-063770). Kido et al. discloses a light emitting device comprising a light emitting layer composed of a polymer and an emitting compound dispersed in the polymer (see abstract).

Art Unit: 1774

7. Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Shi et al. (US 6,329,086). Shi et al. discloses a light emitting device comprising a polymeric light emitting material that is doped with a fluorescent material and is disposed between an anode and a cathode (see claim 6).

Double Patenting

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claim 5 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 6 of U.S. Patent No. 6,329,086. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent claims a doped polymeric material that is disposed between electrodes to form a light emitting device.

Allowable Subject Matter

10. Claims 1-4 are allowed. The closest prior art is considered to be U.S. Patent No. 6,361,887, which teaches a polymeric substance comprising a similar anthracene derivative to the anthracene derivative comprising the polymeric substance of the claims. The prior art fails to

Art Unit: 1774

teach or to render obvious an OLED with a polymer comprising an anthracene derivative attached to a polymeric backbone at the specific position of the anthracene derivative as claimed.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
